Project Tidepool: Project Brief

Fictional demo document. Version 1.0.

1. Overview

Tidepool is a mobile app that lets neighbors lend and borrow books through local drop boxes. The project is planned as a 12-week build with a team of 4 people.

2. Objectives

O1. Let a user list a book in under 30 seconds.
O2. Reach 2,000 registered users within 3 months of launch.
O3. Keep average book-search time under 10 seconds.

3. Requirements

R1. Users can register with an email address and a password.
R2. Users can add a book by scanning its ISBN barcode.
R3. Users can search by title, author, or ISBN.
R4. Users can request a book and receive a confirmation message.
R5. Admins can remove inappropriate listings.

4. Timeline (12 weeks)

Phase	Weeks	Deliverable
Design	1-3	Wireframes approved
Build	4-8	Core features R1-R5 working
Testing	9-10	Bug fixes and load test
Launch	11-12	Public release at end of Week 12

5. Measurable Constraints

• Total budget: $48,000.
• Team size: 4 people (1 designer, 2 developers, 1 tester).
• App download size: at most 40 MB.
• Search results page loads in under 2 seconds on a 4G connection.
• System supports 500 concurrent users.
• Crash-free sessions: at least 99%.
