Brindle Cove Lighthouse Restoration Report

Fictional sample document for OCR testing

Brindle Cove Lighthouse was built in 1894 and stands 42 meters tall. It was converted to automatic operation in 1968.

A restoration project began on 12 March 2025. It was led by engineer Marta Okonkwo and had a total budget of $310,000.

The crew replaced 214 glass panels in the lantern room and repainted the tower in red and white stripes. The work was completed on 30 September 2025.

Since reopening, the lighthouse has welcomed 18,500 visitors. Tickets cost $6 and the site is open Tuesday to Sunday.
